

I hope that young women look back on my legacy and gain confidence to pursue scientific careers.

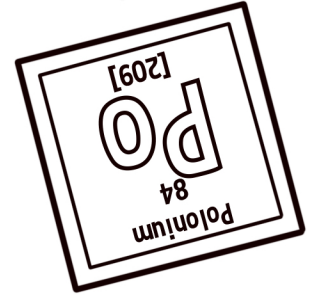

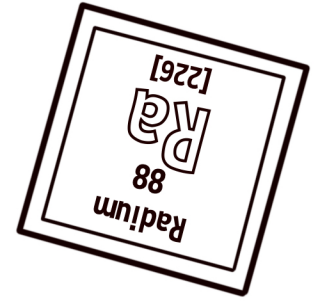

I went on to become the director for the Red Cross Radiology Services and set up France's first military radiology center.

Cut here

My husband and I published 32 scientific papers. One of our papers paved the way for cancer treatments!

I discovered "polonium" and "radium."

Marie Curie

Women of History

My name is Marie Curie. I am a physicist and chemist.

I conducted research in radioactivity.
